EXECUTIVE INTELLIGENCE

Executive brief

This flagship synthetic demonstration publication examines citizen feedback performance in Tanzania. The governed evidence model identifies uneven progress, concentrated risks and actionable opportunities. Findings are linked to synthetic source records, recommendations carry named accountability fields, and all statistical claims are generated from one internally consistent dataset.

DECISION REQUIRED

Require source lineage for every publishable claim for citizen feedback.

STRATEGIC OUTLOOK

Improvement is achievable within 12-18 months if ownership, resourcing and evidence review are maintained.

EXECUTIVE DASHBOARD

Performance and decision confidence

CRITICAL FINDING

Finding 1: Critical finding 1: claim traceability

Across Tanzania's synthetic study areas, claim traceability is the clearest differentiator of citizen feedback performance. The evidence is strongest in Coastal Sample, where rural women face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-EVI-001, EVI-EVI-004

CONFIDENCE

93.5%

DECISION IMPLICATION

Require source lineage for every publishable claim for citizen feedback.

CRITICAL FINDING

Finding 2: Critical finding 2: source triangulation

Across Tanzania's synthetic study areas, source triangulation is the clearest differentiator of citizen feedback performance. The evidence is strongest in Lake Sample, where young adults face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-EVI-002, EVI-EVI-005

CONFIDENCE

94.5%

DECISION IMPLICATION

Triangulate high-risk findings across source types for citizen feedback.

CRITICAL FINDING

Finding 3: Critical finding 3: review consistency

Across Tanzania's synthetic study areas, review consistency is the clearest differentiator of citizen feedback performance. The evidence is strongest in Northern Sample, where persons with disabilities face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-EVI-003, EVI-EVI-006

CONFIDENCE

95.5%

DECISION IMPLICATION

Calibrate reviewer decisions with blinded cases for citizen feedback.

VISUAL INTELLIGENCE

Executive Kpi Cards: Claim traceability rate

What does this evidence mean for decision-makers?

The pattern shows how claim traceability rate varies across priority segments or locations. Leadership should interpret the largest gaps alongside confidence, source lineage and the synthetic-use limitation before selecting an action.
