Synthetic demonstration. Not official statistics.

EXECUTIVE INTELLIGENCE

Executive brief

This flagship synthetic demonstration publication examines public service delivery performance in Kenya. The governed evidence model identifies uneven progress, concentrated risks and actionable opportunities. Findings are linked to synthetic source records, recommendations carry named accountability fields, and all statistical claims are generated from one internally consistent dataset.

DECISION REQUIRED

Issue a cabinet delivery directive with named accountabilities for public service delivery.

STRATEGIC OUTLOOK

Improvement is achievable within 12-18 months if ownership, resourcing and evidence review are maintained.

CRITICAL FINDING

Finding 1: Critical finding 1: policy reach

Across Kenya's synthetic study areas, policy reach is the clearest differentiator of public service delivery performance. The evidence is strongest in Nairobi Metro, where rural women face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-GOV-001, EVI-GOV-004

CONFIDENCE

90.5%

DECISION IMPLICATION

Issue a cabinet delivery directive with named accountabilities for public service delivery.

CRITICAL FINDING

Finding 2: Critical finding 2: administrative burden

Across Kenya's synthetic study areas, administrative burden is the clearest differentiator of public service delivery performance. The evidence is strongest in Coast Counties, where young adults face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-GOV-002, EVI-GOV-005

CONFIDENCE

91.5%

DECISION IMPLICATION

Simplify the highest-burden service procedures for public service delivery.

CRITICAL FINDING

Finding 3: Critical finding 3: county implementation

Across Kenya's synthetic study areas, county implementation variance is the clearest differentiator of public service delivery performance. The evidence is strongest in Western Counties, where persons with disabilities face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-GOV-003, EVI-GOV-006

CONFIDENCE

92.5%

DECISION IMPLICATION

Deploy county implementation support teams for public service delivery.

VISUAL INTELLIGENCE

Executive Kpi Cards: Policy reach rate

What does this evidence mean for decision-makers?

The pattern shows how policy reach rate varies across priority segments or locations. Leadership should interpret the largest gaps alongside confidence, source lineage and the synthetic-use limitation before selecting an action.
