EXECUTIVE INTELLIGENCE

Executive brief

This flagship synthetic demonstration publication examines integrated livelihoods performance in Uganda. The governed evidence model identifies uneven progress, concentrated risks and actionable opportunities. Findings are linked to synthetic source records, recommendations carry named accountability fields, and all statistical claims are generated from one internally consistent dataset.

DECISION REQUIRED

Approve an adaptive results and learning window for integrated livelihoods.

STRATEGIC OUTLOOK

Improvement is achievable within 12-18 months if ownership, resourcing and evidence review are maintained.

CRITICAL FINDING

Finding 1: Critical finding 1: outcome additionality

Across Uganda's synthetic study areas, outcome additionality is the clearest differentiator of integrated livelihoods performance. The evidence is strongest in Northern Livelihoods Cluster, where rural women face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-DON-001, EVI-DON-004

CONFIDENCE

93%

DECISION IMPLICATION

Approve an adaptive results and learning window for integrated livelihoods.

CRITICAL FINDING

Finding 2: Critical finding 2: value for money

Across Uganda's synthetic study areas, value for money is the clearest differentiator of integrated livelihoods performance. The evidence is strongest in Eastern Enterprise Cluster, where young adults face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-DON-002, EVI-DON-005

CONFIDENCE

94%

DECISION IMPLICATION

Reallocate financing toward high-additionality pathways for integrated livelihoods.

CRITICAL FINDING

Finding 3: Critical finding 3: livelihood resilience

Across Uganda's synthetic study areas, livelihood resilience is the clearest differentiator of integrated livelihoods performance. The evidence is strongest in Lake Communities, where persons with disabilities face the largest gap. If the pattern remains unaddressed for twelve months, it is likely to weaken equity, delivery confidence and the durability of outcomes.

EVIDENCE

EVI-DON-003, EVI-DON-006

CONFIDENCE

89.5%

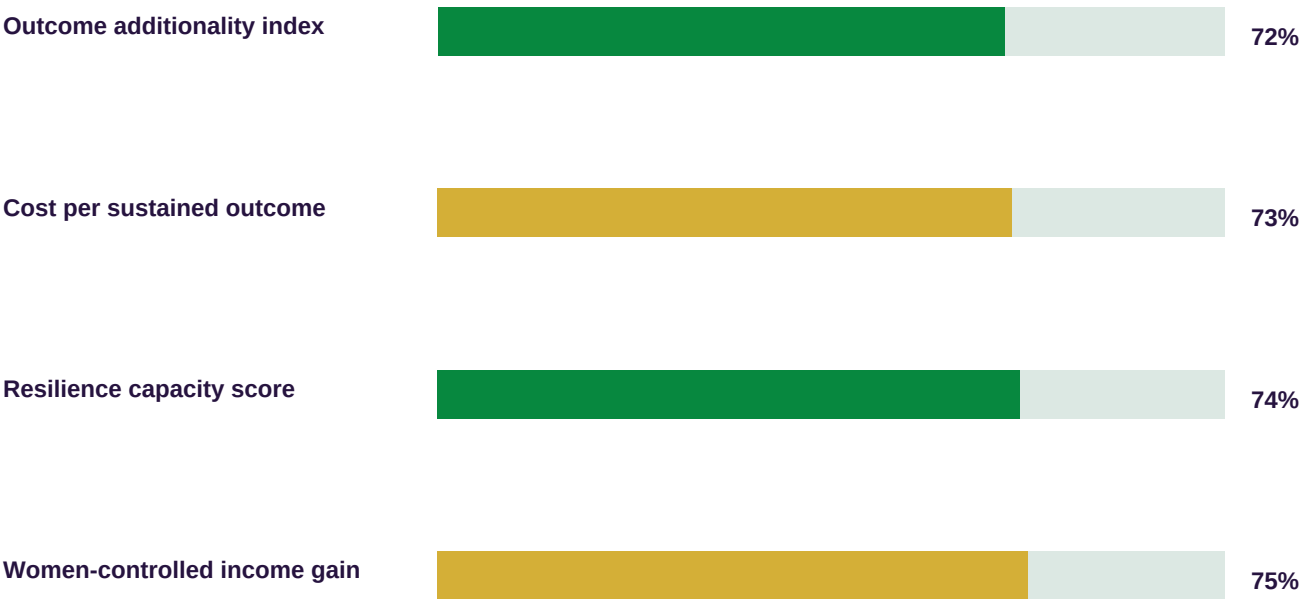

DECISION IMPLICATION

Introduce equity-weighted value-for-money reviews for integrated livelihoods.

VISUAL INTELLIGENCE

Executive Kpi Cards: Outcome additionality index

What does this evidence mean for decision-makers?

The pattern shows how outcome additionality index varies across priority segments or locations. Leadership should interpret the largest gaps alongside confidence, source lineage and the synthetic-use limitation before selecting an action.

Evidence: EVI-DON-001, EVI-DON-004

VISUAL INTELLIGENCE

Regional Heat Map: Cost per sustained outcome

What does this evidence mean for decision-makers?
