

VOICEINSIGHTS AFRICA

SYNTHETIC DEMONSTRATION PUBLICATION

Climate Adaptation Intelligence Report

Mozambique | Climate Adaptation

3,658 synthetic responses

Prepared by VoiceInsights Africa

Every Voice. Every Language. Every Insight.

Synthetic demonstration. Not official statistics.

Mozambique has made real gains in climate adaptation performance – and real gaps remain alongside them. This publication separates the two, using a governed evidence model built to surface risk and opportunity, not just describe them. No claim in this publication stands alone: findings link to synthetic evidence, recommendations carry a named owner, and every statistic shares one internally consistent dataset.

Sample: 3658 synthetic responses – 83% response rate – 4 regions

Publication quality gate: publication ready

Zambezia Province: 68% performance, 1135 responses, risk WATCH
Sofala Province: 69% performance, 987 responses, risk WATCH
Nampula Province: 70% performance, 841 responses, risk STABLE
Inhambane Province: 71% performance, 695 responses, risk STABLE

sex: Women 52% & Men 47% & Other / prefer not to say 1%

age: 18â 24 24% & 25â 39 38% & 40â 59 27% & 60+ 11%

location: Urban 44% & Rural 56%

IND-01 Adaptive-capacity index: 82% vs target 89% â WATCH

IND-02 Resilience-financing coverage: 49% vs target 90% â OFF_TRACK

IND-03 Early-warning reach rate: 50% vs target 91% â OFF_TRACK

IND-04 Community adaptation-plan completion: 51% vs target 92% â OFF_TRACK

What would it take to fix adaptive-capacity gaps? Start with Zambezia Province, where the signal sits at 54% and rural women carry most of the shortfall. The honest answer is sustained attention, not a single intervention. Zambezia Province shows the sharpest divide, where rural women carry the largest share of the gap. Left unaddressed for a year, the imbalance is likely to erode equity, delivery confidence and the durability of results.

Evidence: EVI-CLI-001, EVI-CLI-004 • Confidence 94.5%

Resilience-financing allocation is not a marginal delivery issue. In Sofala Province, the governed evidence indicates a 55% performance signal, with young adults carrying the most consequential constraint. Left unaddressed, resilience-financing allocation becomes a structural risk to climate adaptation delivery in Mozambique, not a temporary dip. Sofala Province is furthest exposed, and young adults would carry the earliest and heaviest consequences of a further year's delay.

Evidence: EVI-CLI-002, EVI-CLI-005 • Confidence 95.5%

Two things are true at once about climate-shock early-warning reach. The national picture is improving, and Nampula Province – where persons with disabilities report a 56% signal – is not improving fast enough to close the gap. Climate adaptation performance in Mozambique looks stable in aggregate but splits sharply once climate-shock early-warning reach is disaggregated. Nampula Province anchors the low end, and persons with disabilities bear most of that shortfall – a pattern that risks compounding without intervention within the year.

Evidence: EVI-CLI-003, EVI-CLI-006 – Confidence 96.5%

Frontline workers in Inhambane Province are living the consequence of community-level adaptation planning, not simply reporting it. Their 57% signal is the clearest evidence leadership has that current measures fall short. Frontline workers in Inhambane Province do not experience community-level adaptation planning as an abstract metric. They experience it as the difference between climate adaptation delivery that works and delivery that does not, and a twelve-month delay would deepen that gap rather than hold it steady.

Evidence: EVI-CLI-004, EVI-CLI-007 • Confidence 92%

The aggregate result conceals a material implementation divide. Zambezia Province records a 58% signal for cross-sectoral climate coordination; the shortfall is concentrated among low-income households, where service continuity and confidence move together. This is not a new problem.

Evidence: EVI-CLI-005, EVI-CLI-008 â€¢ Confidence 93%

Zambezia Province â Why does Zambezia Province lag behind? Ask rural women, and the answer comes back to adaptive-capacity gaps.â

Sofala Province â Elsewhere, resilience-financing allocation might be a footnote. For young adults in Sofala Province, it is the whole story.â

Nampula Province â Persons with disabilities in Nampula Province frame it simply: when climate-shock early-warning reach breaks down, everything else does too.â

Inhambane Province â In Inhambane Province, community-level adaptation planning shapes whether frontline workers can turn services into lasting outcomes.â

Zambezia Province â Low-income households in Zambezia Province put it plainly: cross-sectoral climate coordination is what decides whether progress holds or slips back.â

Sofala Province â Why does Sofala Province lag behind? Ask service managers, and the answer comes back to adaptive-capacity gaps.â

Nampula Province â Elsewhere, resilience-financing allocation might be a footnote. For community leaders in Nampula Province, it is the whole story.â

Inhambane Province â Private-sector partners in Inhambane Province frame it simply: when climate-shock early-warning reach breaks down, everything else does too.â

Zambezia Province â In Zambezia Province, community-level adaptation planning shapes whether rural women can turn services into lasting outcomes.â

Sofala Province â Young adults in Sofala Province put it plainly: cross-sectoral climate coordination is what decides whether progress holds or slips back.â

Risks and alternative trajectories are modelled to show how VoiceInsights translates evidence into prioritised management choices.

DEC-CLI-01 CRITICAL: Target resilience-financing rounds at the lowest-adaptive-capacity communities. Owner: Country Director / Programme Executive; Timeline: 0â 90 days; Indicator: Proportion of agreed implementation steps verified on schedule for DEC-CLI-01

DEC-CLI-02 CRITICAL: Scale climate-shock early-warning reach in flood-prone districts. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-CLI-02)

DEC-CLI-03 HIGH: Fund community-level adaptation planning processes. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Number of agreed milestones for DEC-CLI-03 confirmed complete at each quarterly review

DEC-CLI-04 HIGH: Strengthen cross-sectoral climate coordination mechanisms. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Percentage of agreed milestones completed for DEC-CLI-04

DEC-CLI-05 MEDIUM: Prioritise financing based on verified adaptive-capacity gaps. Owner: Country Director / Programme Executive; Timeline: 6â 18 months; Indicator: Share of the medium-tier delivery plan confirmed complete each quarter (DEC-CLI-05)

Target resilience-financing rounds at the lowest-adaptive-capacity communities.

Strategic priority: CRITICAL

Evidence used: EVI-CLI-001, EVI-CLI-004

Rationale: What would it take to fix adaptive-capacity gaps? Start with Zambezia Province, where the signal sits at 54% and rural women carry most of the shortfall. The honest answer is sustained attention, not a single intervention. Zambezia Province shows the sharpest divide, where rural women carry the largest share of the gap. Left unaddressed for a year, the imbalance is likely to erode equity, delivery confidence and the durability of results.

Expected benefit: A more consistent climate adaptation experience for the groups currently furthest behind.

Expected risk: Weak cross-team coordination during early implementation

Dependencies: Named executive sponsor; Confirmed budget release; Timely data collection for the next reporting cycle

Budget requirement: Medium to high â requires a dedicated budget line and phased release

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 0â 90 days

Monitoring indicator: Proportion of agreed implementation steps verified on schedule for DEC-CLI-01

Success criteria: Milestone completion confirmed by evidence review, not self-reported progress

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Scale climate-shock early-warning reach in flood-prone districts.

Strategic priority: CRITICAL

Evidence used: EVI-CLI-002, EVI-CLI-005

Rationale: Resilience-financing allocation is not a marginal delivery issue. In Sofala Province, the governed evidence indicates a 55% performance signal, with young adults carrying the most consequential constraint. Left unaddressed, resilience-financing allocation becomes a structural risk to climate adaptation delivery in Mozambique, not a temporary dip. Sofala Province is furthest exposed, and young adults would carry the earliest and heaviest consequences of a further year's delay.

Expected benefit: Faster, better-evidenced climate adaptation decisions that donor leadership can act on with confidence.

Expected risk: Competing priorities crowding out sustained follow-through

Dependencies: Validated operational baseline; Cross-team delivery coordination; Sign-off from the relevant oversight body

Budget requirement: High â full business case and multi-year funding commitment required

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â 12 months

Monitoring indicator: Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-CLI-02)

Success criteria: Verified evidence of at least 80% delivery against the agreed milestone plan

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Fund community-level adaptation planning processes.

Strategic priority: HIGH

Evidence used: EVI-CLI-003, EVI-CLI-006

Rationale: Two things are true at once about climate-shock early-warning reach. The national picture is improving, and Nampula Province – where persons with disabilities report a 56% signal – is not improving fast enough to close the gap. Climate adaptation performance in Mozambique looks stable in aggregate but splits sharply once climate-shock early-warning reach is disaggregated. Nampula Province anchors the low end, and persons with disabilities bear most of that shortfall – a pattern that risks compounding without intervention within the year.

Expected benefit: Reduced variation in climate adaptation delivery and a stronger evidence base for the next planning cycle.

Expected risk: Fragmented accountability once implementation moves beyond the pilot stage

Dependencies: Quarterly evidence review; Stable staffing through the delivery window; Named executive sponsor

Budget requirement: Low to medium – validate through the formal planning cycle

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3 – 12 months

Monitoring indicator: Number of agreed milestones for DEC-CLI-03 confirmed complete at each quarterly review

Success criteria: At least 80% of milestones achieved with verified evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Strengthen cross-sectoral climate coordination mechanisms.

Strategic priority: HIGH

Evidence used: EVI-CLI-004, EVI-CLI-007

Rationale: Frontline workers in Inhambane Province are living the consequence of community-level adaptation planning, not simply reporting it. Their 57% signal is the clearest evidence leadership has that current measures fall short. Frontline workers in Inhambane Province do not experience community-level adaptation planning as an abstract metric. They experience it as the difference between climate adaptation delivery that works and delivery that does not, and a twelve-month delay would deepen that gap rather than hold it steady.

Expected benefit: A stronger, more defensible case for climate adaptation investment in the next planning cycle.

Expected risk: Execution capacity and coordination risk

Dependencies: Confirmed budget release; Timely data collection for the next reporting cycle; Validated operational baseline

Budget requirement: Low – absorbable within existing allocations, subject to confirmation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3–12 months

Monitoring indicator: Percentage of agreed milestones completed for DEC-CLI-04

Success criteria: A majority of milestones achieved, each independently verified against real evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Prioritise financing based on verified adaptive-capacity gaps.

Strategic priority: MEDIUM

Evidence used: EVI-CLI-005, EVI-CLI-008

Rationale: The aggregate result conceals a material implementation divide. Zambezia Province records a 58% signal for cross-sectoral climate coordination; the shortfall is concentrated among low-income households, where service continuity and confidence move together. This is not a new problem.

Expected benefit: The evidence points toward improved climate adaptation outcomes, though the size of the gain will depend on how consistently the action is resourced.

Expected risk: Likely – though not certain – erosion of momentum if the initial sponsor changes role

Dependencies: Cross-team delivery coordination; Sign-off from the relevant oversight body; Quarterly evidence review

Budget requirement: Low – deliverable inside the current operating budget with light validation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 6–18 months

Monitoring indicator: Share of the medium-tier delivery plan confirmed complete each quarter (DEC-CLI-05)

Success criteria: Milestone completion confirmed by evidence review, not self-reported progress

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

research objectives: Assess climate adaptation performance and equity; Identify operational drivers and decision priorities

evaluation questions: What outcomes are changing?; Who is being left behind?; Which actions are most likely to improve performance?

sampling frame: Synthetic programme population frame for Mozambique

sample size: 3658

stratification: Region; Location type; Sex; Age; Disability

weights: Normalized post-stratification weights

confidence intervals: 95%

design effect: 1.9

missing data: Documented and sensitivity-tested

reliability: Cronbach alpha 0.86

validity: Content and construct validity checks

metadata: Complete synthetic data dictionary and lineage registry

Publication level: 34 generated publication pages

protocol: Governed synthetic research protocol with sampling, weighting, reliability, validity and reproducibility controls

ethics: Synthetic records only; no real participants or personal data

peer review: Independent synthetic-publication review checklist completed

reproducibility: Deterministic inputs, versioned dataset and export manifest

inferential statistics: Enabled where assumptions and design permit

segmentation: Evidence-led segments

trend analysis: Three-period synthetic series

DEC-CLI-01: Target resilience-financing rounds at the lowest-adaptive-capacity communities. Owner Country Director / Programme Executive 0 90 days Medium to high requires a dedicated budget line and phased release cost Indicator Proportion of agreed implementation steps verified on schedule for DEC-CLI-01

DEC-CLI-02: Scale climate-shock early-warning reach in flood-prone districts. Owner Country Director / Programme Executive 3 12 months High full business case and multi-year funding commitment required cost Indicator Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-CLI-02)

DEC-CLI-03: Fund community-level adaptation planning processes. Owner Country Director / Programme Executive 3 12 months Low to medium validate through the formal planning cycle cost Indicator Number of agreed milestones for DEC-CLI-03 confirmed complete at each quarterly review

DEC-CLI-04: Strengthen cross-sectoral climate coordination mechanisms. Owner Country Director / Programme Executive 3 12 months Low absorbable within existing allocations, subject to confirmation cost Indicator Percentage of agreed milestones completed for DEC-CLI-04

DEC-CLI-05: Prioritise financing based on verified adaptive-capacity gaps. Owner Country Director / Programme Executive 6 18 months Low deliverable inside the current operating budget with light validation cost Indicator Share of the medium-tier delivery plan confirmed complete each quarter (DEC-CLI-05)
