

VOICEINSIGHTS AFRICA

SYNTHETIC DEMONSTRATION PUBLICATION

Customer Experience Intelligence Report

Tanzania | Customer Experience

1,636 synthetic responses

Prepared by VoiceInsights Africa

Every Voice. Every Language. Every Insight.

Synthetic demonstration. Not official statistics.

Tanzania has made real gains in customer experience performance and real gaps remain alongside them. This publication separates the two, using a governed evidence model built to surface risk and opportunity, not just describe them. No claim in this publication stands alone: findings link to synthetic evidence, recommendations carry a named owner, and every statistic shares one internally consistent dataset.

Sample: 1636 synthetic responses and 84% response rate and 4 regions

Publication quality gate: publication ready

Dar es Salaam: 68% performance, 509 responses, risk WATCH

Northern Zone: 69% performance, 441 responses, risk WATCH

Lake Zone: 70% performance, 376 responses, risk STABLE

Digital-only Customers: 71% performance, 310 responses, risk STABLE

sex: Women 52% & Men 47% & Other / prefer not to say 1%

age: 18& 24 24% & 25& 39 38% & 40& 59 27% & 60+ 11%

location: Urban 44% & Rural 56%

IND-01 Customer effort score: 66% vs target 90% â OFF_TRACK
IND-02 First-contact resolution: 67% vs target 91% â OFF_TRACK
IND-03 Trust index: 68% vs target 92% â OFF_TRACK
IND-04 Predicted retention rate: 69% vs target 76% â WATCH

Journey friction has become an accountability question rather than a measurement question. Evidence from Dar es Salaam places the signal at 60% and shows that rural women experience the largest gap between policy intent and lived delivery. The choice facing customer experience leadership in Tanzania is straightforward even if the fix is not: act on journey friction now, concentrated in Dar es Salaam where rural women carry the largest share of the gap, or accept a wider gap in a year's time.

Evidence: EVI-CUS-001, EVI-CUS-004 & Confidence 92.5%

61%. That is the first-contact resolution signal recorded in Northern Zone, and the headline figure understates the problem: disaggregated by group, young adults sit well below it. The clearest gap sits in Northern Zone, concentrated among young adults. A twelve-month delay would let the gap compound into a harder, costlier problem. Evidence: EVI-CUS-002, EVI-CUS-005 â€¢ Confidence 93.5%

The aggregate result conceals a material implementation divide. Lake Zone records a 62% signal for trust and transparency; the shortfall is concentrated among persons with disabilities, where service continuity and confidence move together. Of every study area examined in Tanzania, trust and transparency show up hardest there, and persons with disabilities feel it most. A year of inaction would turn a gap into a pattern that is far harder to reverse.

Evidence: EVI-CUS-003, EVI-CUS-006 â€¢ Confidence 94.5%

Two things are true at once about vulnerable customer inclusion. The national picture is improving, and Digital-only Customers — where frontline workers report a 63% signal — is not improving fast enough to close the gap. Customer experience performance in Tanzania looks stable in aggregate but splits sharply once vulnerable customer inclusion is disaggregated. Digital-only Customers anchors the low end, and frontline workers bear most of that shortfall — a pattern that risks compounding without intervention within the year.

Evidence: EVI-CUS-004, EVI-CUS-007 — Confidence 95.5%

The strategic opportunity lies in the variation, not the average. At 64%, Dar es Salaam's churn propensity signal shows where implementation can move quickly, while the experience of low-income households defines the safeguard that must accompany scale. The same gap that makes churn propensity a risk also makes it an opportunity: Dar es Salaam could close most of the distance to the rest of Tanzania within a year if action starts now, with the clearest gains reaching low-income households first.

Evidence: EVI-CUS-005, EVI-CUS-008 & Confidence 96.5%

Dar es Salaam • In Dar es Salaam, journey friction shapes whether rural women can turn services into lasting outcomes.

Northern Zone • Young adults in Northern Zone put it plainly: first-contact resolution is what decides whether progress holds or slips back.

Lake Zone • Why does Lake Zone lag behind? Ask persons with disabilities, and the answer comes back to trust and transparency.

Digital-only Customers • Elsewhere, vulnerable customer inclusion might be a footnote. For frontline workers in Digital-only Customers, it is the whole story.

Dar es Salaam • Low-income households in Dar es Salaam frame it simply: when churn propensity breaks down, everything else does too.

Northern Zone • In Northern Zone, journey friction shapes whether service managers can turn services into lasting outcomes.

Lake Zone • Community leaders in Lake Zone put it plainly: first-contact resolution is what decides whether progress holds or slips back.

Digital-only Customers • Why does Digital-only Customers lag behind? Ask private-sector partners, and the answer comes back to trust and transparency.

Dar es Salaam • Elsewhere, vulnerable customer inclusion might be a footnote. For rural women in Dar es Salaam, it is the whole story.

Northern Zone • Young adults in Northern Zone frame it simply: when churn propensity breaks down, everything else does too.

Risks and alternative trajectories are modelled to show how VoiceInsights translates evidence into prioritised management choices.

DEC-CUS-01 CRITICAL: Redesign the two highest-friction journeys. Owner: Country Director / Programme Executive; Timeline: 0â 90 days; Indicator: Proportion of agreed implementation steps verified on schedule for DEC-CUS-01

DEC-CUS-02 CRITICAL: Give frontline teams authority for first-contact recovery. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-CUS-02)

DEC-CUS-03 HIGH: Publish plain-language pricing and service explanations. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Number of agreed milestones for DEC-CUS-03 confirmed complete at each quarterly review

DEC-CUS-04 HIGH: Introduce assisted channels for vulnerable customers. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Percentage of agreed milestones completed for DEC-CUS-04

DEC-CUS-05 MEDIUM: Trigger retention interventions from governed churn signals. Owner: Country Director / Programme Executive; Timeline: 6â 18 months; Indicator: Share of the medium-tier delivery plan confirmed complete each quarter (DEC-CUS-05)

Redesign the two highest-friction journeys.

Strategic priority: CRITICAL

Evidence used: EVI-CUS-001, EVI-CUS-004

Rationale: Journey friction has become an accountability question rather than a measurement question. Evidence from Dar es Salaam places the signal at 60% and shows that rural women experience the largest gap between policy intent and lived delivery.

The choice facing customer experience leadership in Tanzania is straightforward even if the fix is not: act on journey friction now, concentrated in Dar es Salaam where rural women carry the largest share of the gap, or accept a wider gap in a year's time.

Expected benefit: Reduced variation in customer experience delivery and a stronger evidence base for the next planning cycle.

Expected risk: Fragmented accountability once implementation moves beyond the pilot stage

Dependencies: Timely data collection for the next reporting cycle; Sign-off from the relevant oversight body; Named executive sponsor

Budget requirement: Medium to high â requires a dedicated budget line and phased release

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 0â 90 days

Monitoring indicator: Proportion of agreed implementation steps verified on schedule for DEC-CUS-01

Success criteria: At least 80% of milestones achieved with verified evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Give frontline teams authority for first-contact recovery.

Strategic priority: CRITICAL

Evidence used: EVI-CUS-002, EVI-CUS-005

Rationale: 61%. That is the first-contact resolution signal recorded in Northern Zone, and the headline figure understates the problem: disaggregated by group, young adults sit well below it. The clearest gap sits in Northern Zone, concentrated among young adults. A twelve-month delay would let the gap compound into a harder, costlier problem. Expected benefit: A stronger, more defensible case for customer experience investment in the next planning cycle.

Expected risk: Execution capacity and coordination risk

Dependencies: Sign-off from the relevant oversight body; Named executive sponsor;

Validated operational baseline

Budget requirement: High â full business case and multi-year funding commitment required

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â 12 months

Monitoring indicator: Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-CUS-02)

Success criteria: A majority of milestones achieved, each independently verified against real evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Publish plain-language pricing and service explanations.

Strategic priority: HIGH

Evidence used: EVI-CUS-003, EVI-CUS-006

Rationale: The aggregate result conceals a material implementation divide. Lake Zone records a 62% signal for trust and transparency; the shortfall is concentrated among persons with disabilities, where service continuity and confidence move together. Of every study area examined in Tanzania, trust and transparency show up hardest there, and persons with disabilities feel it most. A year of inaction would turn a gap into a pattern that is far harder to reverse.

Expected benefit: Improved equity, delivery confidence and measurable customer experience performance.

Expected risk: Insufficient ownership or delayed resourcing

Dependencies: Named executive sponsor; Confirmed budget release; Timely data collection for the next reporting cycle

Budget requirement: Low â deliverable inside the current operating budget with light validation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â 12 months

Monitoring indicator: Number of agreed milestones for DEC-CUS-03 confirmed complete at each quarterly review

Success criteria: Milestone completion confirmed by evidence review, not self-reported progress

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Introduce assisted channels for vulnerable customers.

Strategic priority: HIGH

Evidence used: EVI-CUS-004, EVI-CUS-007

Rationale: Two things are true at once about vulnerable customer inclusion. The national picture is improving, and Digital-only Customers – where frontline workers report a 63% signal – is not improving fast enough to close the gap. Customer experience performance in Tanzania looks stable in aggregate but splits sharply once vulnerable customer inclusion is disaggregated. Digital-only Customers anchors the low end, and frontline workers bear most of that shortfall – a pattern that risks compounding without intervention within the year.

Expected benefit: A more consistent customer experience for the groups currently furthest behind.

Expected risk: Weak cross-team coordination during early implementation

Dependencies: Validated operational baseline; Cross-team delivery coordination; Sign-off from the relevant oversight body

Budget requirement: Medium – likely fundable from existing lines, pending confirmation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3 – 12 months

Monitoring indicator: Percentage of agreed milestones completed for DEC-CUS-04

Success criteria: Verified evidence of at least 80% delivery against the agreed milestone plan

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Trigger retention interventions from governed churn signals.

Strategic priority: MEDIUM

Evidence used: EVI-CUS-005, EVI-CUS-008

Rationale: The strategic opportunity lies in the variation, not the average. At 64%, Dar es Salaam's churn propensity signal shows where implementation can move quickly, while the experience of low-income households defines the safeguard that must accompany scale. The same gap that makes churn propensity a risk also makes it an opportunity: Dar es Salaam could close most of the distance to the rest of Tanzania within a year if action starts now, with the clearest gains reaching low-income households first.

Expected benefit: The evidence points toward improved customer experience outcomes, though the size of the gain will depend on how consistently the action is resourced.

Expected risk: Likely â though not certain â erosion of momentum if the initial sponsor changes role

Dependencies: Quarterly evidence review; Stable staffing through the delivery window; Named executive sponsor

Budget requirement: Low to medium â validate through the formal planning cycle

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 6â 18 months

Monitoring indicator: Share of the medium-tier delivery plan confirmed complete each quarter (DEC-CUS-05)

Success criteria: At least 80% of milestones achieved with verified evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

research objectives: Assess customer experience performance and equity; Identify operational drivers and decision priorities

evaluation questions: What outcomes are changing?; Who is being left behind?; Which actions are most likely to improve performance?

sampling frame: Synthetic programme population frame for Tanzania

sample size: 1636

stratification: Region; Location type; Sex; Age; Disability

weights: Normalized post-stratification weights

confidence intervals: 95%

design effect: 1.6

missing data: Documented and sensitivity-tested

reliability: Cronbach alpha 0.86

validity: Content and construct validity checks

metadata: Complete synthetic data dictionary and lineage registry

Publication level: 34 generated publication pages

protocol: Governed synthetic research protocol with sampling, weighting, reliability, validity and reproducibility controls

ethics: Synthetic records only; no real participants or personal data

peer review: Independent synthetic-publication review checklist completed

reproducibility: Deterministic inputs, versioned dataset and export manifest

inferential statistics: Enabled where assumptions and design permit

segmentation: Evidence-led segments

trend analysis: Three-period synthetic series

DEC-CUS-01: Redesign the two highest-friction journeys. Owner Country Director / Programme Executive 0-90 days Medium to high requires a dedicated budget line and phased release cost Indicator Proportion of agreed implementation steps verified on schedule for DEC-CUS-01

DEC-CUS-02: Give frontline teams authority for first-contact recovery. Owner Country Director / Programme Executive 3-12 months High full business case and multi-year funding commitment required cost Indicator Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-CUS-02)

DEC-CUS-03: Publish plain-language pricing and service explanations. Owner Country Director / Programme Executive 3-12 months Low deliverable inside the current operating budget with light validation cost Indicator Number of agreed milestones for DEC-CUS-03 confirmed complete at each quarterly review

DEC-CUS-04: Introduce assisted channels for vulnerable customers. Owner Country Director / Programme Executive 3-12 months Medium likely fundable from existing lines, pending confirmation cost Indicator Percentage of agreed milestones completed for DEC-CUS-04

DEC-CUS-05: Trigger retention interventions from governed churn signals. Owner Country Director / Programme Executive 6-18 months Low to medium validate through the formal planning cycle cost Indicator Share of the medium-tier delivery plan confirmed complete each quarter (DEC-CUS-05)
