

VOICEINSIGHTS AFRICA

SYNTHETIC DEMONSTRATION PUBLICATION

Displacement and Durable Solutions Intelligence Report

Uganda | Displacement and Durable Solutions

2,556 synthetic responses

Prepared by VoiceInsights Africa

Every Voice. Every Language. Every Insight.

Synthetic demonstration. Not official statistics.

Every number in this publication answers one question: what is actually happening with displacement and durable solutions performance in Uganda, and for whom. The pattern that emerges is one of uneven progress, concentrated risk, and opportunities that remain genuinely actionable. The discipline behind this publication is traceability â synthetic evidence behind every finding, a named owner behind every recommendation, one internally consistent dataset behind every statistic.

Sample: 2556 synthetic responses â 86% response rate â 4 regions

Publication quality gate: publication ready

West Nile Settlements: 82% performance, 794 responses, risk STABLE
Northern Uganda Settlements: 83% performance, 690 responses, risk STABLE
Southwest Settlements: 84% performance, 587 responses, risk STABLE
Kampala Urban Refugees: 52% performance, 485 responses, risk CRITICAL

sex: Women 52% & Men 47% & Other / prefer not to say 1%

age: 18& 24 24% & 25& 39 38% & 40& 59 27% & 60+ 11%

location: Urban 44% & Rural 56%

IND-01 Protracted-displacement duration: 51% vs target 92% â OFF_TRACK

IND-02 Durable-solutions pathway completion rate: 52% vs target 76% â OFF_TRACK

IND-03 Host-community service-strain index: 53% vs target 77% â OFF_TRACK

IND-04 Pathway-tracking data completeness: 54% vs target 78% â OFF_TRACK

Protracted displacement duration is not a marginal delivery issue. In West Nile Settlements, the governed evidence indicates a 54% performance signal, with rural women carrying the most consequential constraint. Left unaddressed, protracted displacement duration becomes a structural risk to displacement and durable solutions delivery in Uganda, not a temporary dip. West Nile Settlements is furthest exposed, and rural women would carry the earliest and heaviest consequences of a further year's delay. Evidence: EVI-DIS-001, EVI-DIS-004 â€¢ Confidence 92%

Host-community service strain has become an accountability question rather than a measurement question. Evidence from Northern Uganda Settlements places the signal at 55% and shows that young adults experience the largest gap between policy intent and lived delivery. The choice facing displacement and durable solutions leadership in Uganda is straightforward even if the fix is not: act on host-community service strain now, concentrated in Northern Uganda Settlements where young adults carry the largest share of the gap, or accept a wider gap in a year's time.

Evidence: EVI-DIS-002, EVI-DIS-005 â€¢ Confidence 93%

Persons with disabilities in Southwest Settlements are living the consequence of durable-solutions pathway completion gaps, not simply reporting it. Their 56% signal is the clearest evidence leadership has that current measures fall short. persons with disabilities in Southwest Settlements do not experience durable-solutions pathway completion gaps as an abstract metric. They experience it as the difference between displacement and durable solutions delivery that works and delivery that does not, and a twelve-month delay would deepen that gap rather than hold it steady.

Evidence: EVI-DIS-003, EVI-DIS-006 â€¢ Confidence 94%

57%. That is the data gaps in pathway-completion tracking signal recorded in Kampala Urban Refugees, and the headline figure understates the problem: disaggregated by group, frontline workers sit well below it. The clearest gap sits in Kampala Urban Refugees, concentrated among frontline workers. A twelve-month delay would let the gap compound into a harder, costlier problem.

Evidence: EVI-DIS-004, EVI-DIS-007 & Confidence 89.5%

The strategic opportunity lies in the variation, not the average. At 58%, West Nile Settlements's return-versus-integration viability signal shows where implementation can move quickly, while the experience of low-income households defines the safeguard that must accompany scale. The same gap that makes return-versus-integration viability a risk also makes it an opportunity: West Nile Settlements could close most of the distance to the rest of Uganda within a year if action starts now, with the clearest gains reaching low-income households first.

Evidence: EVI-DIS-005, EVI-DIS-008 • Confidence 90.5%

West Nile Settlements • Rural women in West Nile Settlements frame it simply: when protracted displacement duration breaks down, everything else does too.

Northern Uganda Settlements • In Northern Uganda Settlements, host-community service strain shapes whether young adults can turn services into lasting outcomes.

Southwest Settlements • Persons with disabilities in Southwest Settlements put it plainly: durable-solutions pathway completion gaps are what decides whether progress holds or slips back.

Kampala Urban Refugees • Why does Kampala Urban Refugees lag behind? Ask frontline workers, and the answer comes back to data gaps in pathway-completion tracking.

West Nile Settlements • Elsewhere, return-versus-integration viability might be a footnote. For low-income households in West Nile Settlements, it is the whole story.

Northern Uganda Settlements • Service managers in Northern Uganda Settlements frame it simply: when protracted displacement duration breaks down, everything else does too.

Southwest Settlements • In Southwest Settlements, host-community service strain shapes whether community leaders can turn services into lasting outcomes.

Kampala Urban Refugees • Private-sector partners in Kampala Urban Refugees put it plainly: durable-solutions pathway completion gaps are what decides whether progress holds or slips back.

West Nile Settlements • Why does West Nile Settlements lag behind? Ask rural women, and the answer comes back to data gaps in pathway-completion tracking.

Northern Uganda Settlements • Elsewhere, return-versus-integration viability might be a footnote. For young adults in Northern Uganda Settlements, it is the whole story.

Risks and alternative trajectories are modelled to show how VoiceInsights translates evidence into prioritised management choices.

DEC-DIS-01 CRITICAL: Prioritise the durable-solutions pathway with the strongest real prospects. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 0â 90 days; Indicator: Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-DIS-01)

DEC-DIS-02 CRITICAL: Invest in host-community services to sustain local integration. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 3â 12 months; Indicator: Number of agreed milestones for DEC-DIS-02 confirmed complete at each quarterly review

DEC-DIS-03 HIGH: Close data gaps in pathway-completion tracking. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 3â 12 months; Indicator: Percentage of agreed milestones completed for DEC-DIS-03

DEC-DIS-04 HIGH: Assess return-versus-integration viability by settlement. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 3â 12 months; Indicator: Share of the high-tier delivery plan confirmed complete each quarter (DEC-DIS-04)

DEC-DIS-05 MEDIUM: Scale livelihoods support tied to durable-solutions pathways. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 6â 18 months; Indicator: Milestone completion rate tracked against the DEC-DIS-05 delivery plan

Prioritise the durable-solutions pathway with the strongest real prospects.

Strategic priority: CRITICAL

Evidence used: EVI-DIS-001, EVI-DIS-004

Rationale: Protracted displacement duration is not a marginal delivery issue. In West Nile Settlements, the governed evidence indicates a 54% performance signal, with rural women carrying the most consequential constraint. Left unaddressed, protracted displacement duration becomes a structural risk to displacement and durable solutions delivery in Uganda, not a temporary dip. West Nile Settlements is furthest exposed, and rural women would carry the earliest and heaviest consequences of a further year's delay.

Expected benefit: A more consistent displacement and durable solutions experience for the groups currently furthest behind.

Expected risk: Weak cross-team coordination during early implementation

Dependencies: Sign-off from the relevant oversight body; Timely data collection for the next reporting cycle; Stable staffing through the delivery window

Budget requirement: High – full business case and multi-year funding commitment required

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 0–90 days

Monitoring indicator: Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-DIS-01)

Success criteria: A majority of milestones achieved, each independently verified against real evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Invest in host-community services to sustain local integration.

Strategic priority: CRITICAL

Evidence used: EVI-DIS-002, EVI-DIS-005

Rationale: Host-community service strain has become an accountability question rather than a measurement question. Evidence from Northern Uganda Settlements places the signal at 55% and shows that young adults experience the largest gap between policy intent and lived delivery. The choice facing displacement and durable solutions leadership in Uganda is straightforward even if the fix is not: act on host-community service strain now, concentrated in Northern Uganda Settlements where young adults carry the largest share of the gap, or accept a wider gap in a year's time.

Expected benefit: Faster, better-evidenced displacement and durable solutions decisions that the humanitarian coordination team can act on with confidence.

Expected risk: Competing priorities crowding out sustained follow-through

Dependencies: Named executive sponsor; Validated operational baseline; Quarterly evidence review

Budget requirement: Medium â detailed costing and fiduciary review required

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â 12 months

Monitoring indicator: Number of agreed milestones for DEC-DIS-02 confirmed complete at each quarterly review

Success criteria: Milestone completion confirmed by evidence review, not self-reported progress

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Close data gaps in pathway-completion tracking.

Strategic priority: HIGH

Evidence used: EVI-DIS-003, EVI-DIS-006

Rationale: Persons with disabilities in Southwest Settlements are living the consequence of durable-solutions pathway completion gaps, not simply reporting it. Their 56% signal is the clearest evidence leadership has that current measures fall short. persons with disabilities in Southwest Settlements do not experience durable-solutions pathway completion gaps as an abstract metric. They experience it as the difference between displacement and durable solutions delivery that works and delivery that does not, and a twelve-month delay would deepen that gap rather than hold it steady.

Expected benefit: Reduced variation in displacement and durable solutions delivery and a stronger evidence base for the next planning cycle.

Expected risk: Fragmented accountability once implementation moves beyond the pilot stage

Dependencies: Validated operational baseline; Quarterly evidence review; Confirmed budget release

Budget requirement: Medium â likely fundable from existing lines, pending confirmation

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â 12 months

Monitoring indicator: Percentage of agreed milestones completed for DEC-DIS-03

Success criteria: Verified evidence of at least 80% delivery against the agreed milestone plan

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Assess return-versus-integration viability by settlement.

Strategic priority: HIGH

Evidence used: EVI-DIS-004, EVI-DIS-007

Rationale: 57%. That is the data gaps in pathway-completion tracking signal recorded in Kampala Urban Refugees, and the headline figure understates the problem: disaggregated by group, frontline workers sit well below it. The clearest gap sits in Kampala Urban Refugees, concentrated among frontline workers. A twelve-month delay would let the gap compound into a harder, costlier problem.

Expected benefit: A stronger, more defensible case for displacement and durable solutions investment in the next planning cycle.

Expected risk: Execution capacity and coordination risk

Dependencies: Quarterly evidence review; Confirmed budget release; Cross-team delivery coordination

Budget requirement: Low to medium â validate through the formal planning cycle

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â12 months

Monitoring indicator: Share of the high-tier delivery plan confirmed complete each quarter (DEC-DIS-04)

Success criteria: At least 80% of milestones achieved with verified evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Scale livelihoods support tied to durable-solutions pathways.

Strategic priority: MEDIUM

Evidence used: EVI-DIS-005, EVI-DIS-008

Rationale: The strategic opportunity lies in the variation, not the average. At 58%, West Nile Settlements's return-versus-integration viability signal shows where implementation can move quickly, while the experience of low-income households defines the safeguard that must accompany scale. The same gap that makes return-versus-integration viability a risk also makes it an opportunity: West Nile Settlements could close most of the distance to the rest of Uganda within a year if action starts now, with the clearest gains reaching low-income households first. Expected benefit: The evidence points toward improved displacement and durable solutions outcomes, though the size of the gain will depend on how consistently the action is resourced.

Expected risk: Likely â though not certain â erosion of momentum if the initial sponsor changes role

Dependencies: Confirmed budget release; Cross-team delivery coordination; Stable staffing through the delivery window

Budget requirement: Low â absorbable within existing allocations, subject to confirmation

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 6â 18 months

Monitoring indicator: Milestone completion rate tracked against the DEC-DIS-05 delivery plan

Success criteria: A majority of milestones achieved, each independently verified against real evidence

research objectives: Assess displacement and durable solutions performance and equity;
Identify operational drivers and decision priorities
evaluation questions: What outcomes are changing?; Who is being left behind?; Which
actions are most likely to improve performance?
sampling frame: Synthetic programme population frame for Uganda
sample size: 2556
stratification: Region; Location type; Sex; Age; Disability
weights: Normalized post-stratification weights
confidence intervals: 95%
design effect: 1.2
missing data: Documented and sensitivity-tested
reliability: Cronbach alpha 0.86
validity: Content and construct validity checks
metadata: Complete synthetic data dictionary and lineage registry

Publication level: 34 generated publication pages

protocol: Governed synthetic research protocol with sampling, weighting, reliability, validity and reproducibility controls

ethics: Synthetic records only; no real participants or personal data

peer review: Independent synthetic-publication review checklist completed

reproducibility: Deterministic inputs, versioned dataset and export manifest

inferential statistics: Enabled where assumptions and design permit

segmentation: Evidence-led segments

trend analysis: Three-period synthetic series

DEC-DIS-01: Prioritise the durable-solutions pathway with the strongest real prospects.

â€ Owner Humanitarian Coordinator / Cluster Lead â€ 0â 90 days â€ High â full business case and multi-year funding commitment required cost â€ Indicator Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-DIS-01)

DEC-DIS-02: Invest in host-community services to sustain local integration. â€ Owner Humanitarian Coordinator / Cluster Lead â€ 3â 12 months â€ Medium â detailed costing and fiduciary review required cost â€ Indicator Number of agreed milestones for DEC-DIS-02 confirmed complete at each quarterly review

DEC-DIS-03: Close data gaps in pathway-completion tracking. â€ Owner Humanitarian Coordinator / Cluster Lead â€ 3â 12 months â€ Medium â likely fundable from existing lines, pending confirmation cost â€ Indicator Percentage of agreed milestones completed for DEC-DIS-03

DEC-DIS-04: Assess return-versus-integration viability by settlement. â€ Owner Humanitarian Coordinator / Cluster Lead â€ 3â 12 months â€ Low to medium â validate through the formal planning cycle cost â€ Indicator Share of the high-tier delivery plan confirmed complete each quarter (DEC-DIS-04)

DEC-DIS-05: Scale livelihoods support tied to durable-solutions pathways. â€ Owner Humanitarian Coordinator / Cluster Lead â€ 6â 18 months â€ Low â absorbable within existing allocations, subject to confirmation cost â€ Indicator Milestone completion rate tracked against the DEC-DIS-05 delivery plan

Relevance: Synthetic evidence indicates a strong relevance signal, subject to the stated design limitations. (86/100). Review relevance evidence at the next formal management gate.

Coherence: Synthetic evidence indicates a moderate-to-strong coherence signal, subject to the stated design limitations. (87/100). Review coherence evidence at the next formal management gate.

Effectiveness: Synthetic evidence indicates a strong effectiveness signal, subject to the stated design limitations. (88/100). Review effectiveness evidence at the next formal management gate.

Efficiency: Synthetic evidence indicates a moderate-to-strong efficiency signal, subject to the stated design limitations. (89/100). Review efficiency evidence at the next formal management gate.

Impact: Synthetic evidence indicates a strong impact signal, subject to the stated design limitations. (90/100). Review impact evidence at the next formal management gate.

Sustainability: Synthetic evidence indicates a moderate-to-strong sustainability signal, subject to the stated design limitations. (91/100). Review sustainability evidence at the next formal management gate.

Impact: Sustained, equitable improvement in displacement and durable solutions performance

OC-01: Improved displacement and durable solutions delivery and accountability â indicators IND-01, IND-02

OC-02: More equitable and durable outcomes â indicators IND-03, IND-04

OUT-01: Verified findings and interpreted decision products

OUT-02: Assigned actions with monitoring indicators

Assumptions: Leadership ownership; Safeguarding and privacy controls remain effective

Means of verification: Evidence registry; Quarterly management review; Follow-up measurement
