

VOICEINSIGHTS AFRICA

SYNTHETIC DEMONSTRATION PUBLICATION

# Evidence Explorer Report

Tanzania | Citizen Feedback

2,353 synthetic responses

Prepared by VoiceInsights Africa

Every Voice. Every Language. Every Insight.

Synthetic demonstration. Not official statistics.

Progress on citizen feedback performance in Tanzania is real, but it is not evenly shared. This publication traces where the gains are holding, where the risk is concentrated, and what remains within reach. Findings are linked to synthetic source records, recommendations carry named accountability fields, and all statistical claims are generated from one internally consistent dataset.

Sample: 2353 synthetic responses • 87% response rate • 4 regions

Publication quality gate: publication ready

Coastal Sample: 68% performance, 730 responses, risk WATCH  
Lake Sample: 69% performance, 635 responses, risk WATCH  
Northern Sample: 70% performance, 541 responses, risk STABLE  
Urban Sample: 71% performance, 447 responses, risk STABLE

sex: Women 52% & Men 47% & Other / prefer not to say 1%

age: 18& 24 24% & 25& 39 38% & 40& 59 27% & 60+ 11%

location: Urban 44% & Rural 56%

IND-01 Claim traceability rate: 52% vs target 76% â OFF\_TRACK  
IND-02 Triangulation strength: 53% vs target 77% â OFF\_TRACK  
IND-03 Reviewer agreement: 54% vs target 78% â OFF\_TRACK  
IND-04 Grounded explanation rate: 55% vs target 79% â OFF\_TRACK

What would it take to fix claim traceability? Start with Coastal Sample, where the signal sits at 75% and rural women carry most of the shortfall. The honest answer is sustained attention, not a single intervention. Coastal Sample shows the sharpest divide, where rural women carry the largest share of the gap. Left unaddressed for a year, the imbalance is likely to erode equity, delivery confidence and the durability of results.

Evidence: EVI-EVI-001, EVI-EVI-004 • Confidence 93.5%

Source triangulation is not a marginal delivery issue. In Lake Sample, the governed evidence indicates a 76% performance signal, with young adults carrying the most consequential constraint. Left unaddressed, source triangulation becomes a structural risk to citizen feedback delivery in Tanzania, not a temporary dip. Lake Sample is furthest exposed, and young adults would carry the earliest and heaviest consequences of a further year's delay.

Evidence: EVI-EVI-002, EVI-EVI-005 & Confidence 94.5%

Two things are true at once about review consistency. The national picture is improving, and Northern Sample – where persons with disabilities report a 77% signal – is not improving fast enough to close the gap. Citizen feedback performance in Tanzania looks stable in aggregate but splits sharply once review consistency is disaggregated. Northern Sample anchors the low end, and persons with disabilities bear most of that shortfall – a pattern that risks compounding without intervention within the year. Evidence: EVI-EVI-003, EVI-EVI-006 – Confidence 95.5%

Frontline workers in Urban Sample are living the consequence of privacy-safe disclosure, not simply reporting it. Their 78% signal is the clearest evidence leadership has that current measures fall short. frontline workers in Urban Sample do not experience privacy-safe disclosure as an abstract metric. They experience it as the difference between citizen feedback delivery that works and delivery that does not, and a twelve-month delay would deepen that gap rather than hold it steady.

Evidence: EVI-EVI-004, EVI-EVI-007 â€¢ Confidence 96.5%

The strategic opportunity lies in the variation, not the average. At 79%, Coastal Sample's AI explanation grounding signal shows where implementation can move quickly, while the experience of low-income households defines the safeguard that must accompany scale. The same gap that makes AI explanation grounding a risk also makes it an opportunity: Coastal Sample could close most of the distance to the rest of Tanzania within a year if action starts now, with the clearest gains reaching low-income households first.

Evidence: EVI-EVI-005, EVI-EVI-008 & Confidence 92%

Coastal Sample â Rural women in Coastal Sample frame it simply: when claim traceability breaks down, everything else does too.â

Lake Sample â In Lake Sample, source triangulation shapes whether young adults can turn services into lasting outcomes.â

Northern Sample â Persons with disabilities in Northern Sample put it plainly: review consistency is what decides whether progress holds or slips back.â

Urban Sample â Why does Urban Sample lag behind? Ask frontline workers, and the answer comes back to privacy-safe disclosure.â

Coastal Sample â Elsewhere, AI explanation grounding might be a footnote. For low-income households in Coastal Sample, it is the whole story.â

Lake Sample â Service managers in Lake Sample frame it simply: when claim traceability breaks down, everything else does too.â

Northern Sample â In Northern Sample, source triangulation shapes whether community leaders can turn services into lasting outcomes.â

Urban Sample â Private-sector partners in Urban Sample put it plainly: review consistency is what decides whether progress holds or slips back.â

Coastal Sample â Why does Coastal Sample lag behind? Ask rural women, and the answer comes back to privacy-safe disclosure.â

Lake Sample â Elsewhere, AI explanation grounding might be a footnote. For young adults in Lake Sample, it is the whole story.â

Risks and alternative trajectories are modelled to show how VoiceInsights translates evidence into prioritised management choices.

DEC-EVI-01 CRITICAL: Require source lineage for every publishable claim. Owner: Country Director / Programme Executive; Timeline: 0â 90 days; Indicator: Share of the critical-tier delivery plan confirmed complete each quarter (DEC-EVI-01)

DEC-EVI-02 CRITICAL: Triangulate high-risk findings across source types. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Milestone completion rate tracked against the DEC-EVI-02 delivery plan

DEC-EVI-03 HIGH: Calibrate reviewer decisions with blinded cases. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Proportion of agreed implementation steps verified on schedule for DEC-EVI-03

DEC-EVI-04 HIGH: Enforce disclosure checks before evidence download. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Quarterly-verified progress against the milestones agreed for this high-tier decision (DEC-EVI-04)

DEC-EVI-05 MEDIUM: Block AI explanations without approved citations. Owner: Country Director / Programme Executive; Timeline: 6â 18 months; Indicator: Number of agreed milestones for DEC-EVI-05 confirmed complete at each quarterly review

Require source lineage for every publishable claim.

Strategic priority: CRITICAL

Evidence used: EVI-EVI-001, EVI-EVI-004

Rationale: What would it take to fix claim traceability? Start with Coastal Sample, where the signal sits at 75% and rural women carry most of the shortfall. The honest answer is sustained attention, not a single intervention. Coastal Sample shows the sharpest divide, where rural women carry the largest share of the gap. Left unaddressed for a year, the imbalance is likely to erode equity, delivery confidence and the durability of results.

Expected benefit: Reduced variation in citizen feedback delivery and a stronger evidence base for the next planning cycle.

Expected risk: Fragmented accountability once implementation moves beyond the pilot stage

Dependencies: Cross-team delivery coordination; Stable staffing through the delivery window; Timely data collection for the next reporting cycle

Budget requirement: High – full business case and multi-year funding commitment required

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 0–90 days

Monitoring indicator: Share of the critical-tier delivery plan confirmed complete each quarter (DEC-EVI-01)

Success criteria: Milestone completion confirmed by evidence review, not self-reported progress

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Triangulate high-risk findings across source types.

Strategic priority: CRITICAL

Evidence used: EVI-EVI-002, EVI-EVI-005

Rationale: Source triangulation is not a marginal delivery issue. In Lake Sample, the governed evidence indicates a 76% performance signal, with young adults carrying the most consequential constraint. Left unaddressed, source triangulation becomes a structural risk to citizen feedback delivery in Tanzania, not a temporary dip. Lake Sample is furthest exposed, and young adults would carry the earliest and heaviest consequences of a further year's delay.

Expected benefit: A stronger, more defensible case for citizen feedback investment in the next planning cycle.

Expected risk: Execution capacity and coordination risk

Dependencies: Stable staffing through the delivery window; Timely data collection for the next reporting cycle; Sign-off from the relevant oversight body

Budget requirement: Medium â detailed costing and fiduciary review required

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â12 months

Monitoring indicator: Milestone completion rate tracked against the DEC-EVI-02 delivery plan

Success criteria: Verified evidence of at least 80% delivery against the agreed milestone plan

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Calibrate reviewer decisions with blinded cases.

Strategic priority: HIGH

Evidence used: EVI-EVI-003, EVI-EVI-006

Rationale: Two things are true at once about review consistency. The national picture is improving, and Northern Sample – where persons with disabilities report a 77% signal – is not improving fast enough to close the gap. Citizen feedback performance in Tanzania looks stable in aggregate but splits sharply once review consistency is disaggregated. Northern Sample anchors the low end, and persons with disabilities bear most of that shortfall – a pattern that risks compounding without intervention within the year.

Expected benefit: Improved equity, delivery confidence and measurable citizen feedback performance.

Expected risk: Insufficient ownership or delayed resourcing

Dependencies: Timely data collection for the next reporting cycle; Sign-off from the relevant oversight body; Named executive sponsor

Budget requirement: Low to medium – validate through the formal planning cycle

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3–12 months

Monitoring indicator: Proportion of agreed implementation steps verified on schedule for DEC-EVI-03

Success criteria: At least 80% of milestones achieved with verified evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Enforce disclosure checks before evidence download.

Strategic priority: HIGH

Evidence used: EVI-EVI-004, EVI-EVI-007

Rationale: Frontline workers in Urban Sample are living the consequence of privacy-safe disclosure, not simply reporting it. Their 78% signal is the clearest evidence leadership has that current measures fall short. Frontline workers in Urban Sample do not experience privacy-safe disclosure as an abstract metric. They experience it as the difference between citizen feedback delivery that works and delivery that does not, and a twelve-month delay would deepen that gap rather than hold it steady.

Expected benefit: A more consistent citizen feedback experience for the groups currently furthest behind.

Expected risk: Weak cross-team coordination during early implementation

Dependencies: Sign-off from the relevant oversight body; Named executive sponsor;

Validated operational baseline

Budget requirement: Low – absorbable within existing allocations, subject to confirmation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3–12 months

Monitoring indicator: Quarterly-verified progress against the milestones agreed for this high-tier decision (DEC-EVI-04)

Success criteria: A majority of milestones achieved, each independently verified against real evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Block AI explanations without approved citations.

Strategic priority: MEDIUM

Evidence used: EVI-EVI-005, EVI-EVI-008

Rationale: The strategic opportunity lies in the variation, not the average. At 79%, Coastal Sample's AI explanation grounding signal shows where implementation can move quickly, while the experience of low-income households defines the safeguard that must accompany scale. The same gap that makes AI explanation grounding a risk also makes it an opportunity: Coastal Sample could close most of the distance to the rest of Tanzania within a year if action starts now, with the clearest gains reaching low-income households first.

Expected benefit: The evidence points toward improved citizen feedback outcomes, though the size of the gain will depend on how consistently the action is resourced.

Expected risk: Likely – though not certain – erosion of momentum if the initial sponsor changes role

Dependencies: Named executive sponsor; Confirmed budget release; Timely data collection for the next reporting cycle

Budget requirement: Low – deliverable inside the current operating budget with light validation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 6–18 months

Monitoring indicator: Number of agreed milestones for DEC-EVI-05 confirmed complete at each quarterly review

Success criteria: Milestone completion confirmed by evidence review, not self-reported progress

Management response: PENDING FORMAL MANAGEMENT RESPONSE

research objectives: Assess citizen feedback performance and equity; Identify operational drivers and decision priorities

evaluation questions: What outcomes are changing?; Who is being left behind?; Which actions are most likely to improve performance?

sampling frame: Synthetic programme population frame for Tanzania

sample size: 2353

stratification: Region; Location type; Sex; Age; Disability

weights: Normalized post-stratification weights

confidence intervals: 95%

design effect: 1.6

missing data: Documented and sensitivity-tested

reliability: Cronbach alpha 0.86

validity: Content and construct validity checks

metadata: Complete synthetic data dictionary and lineage registry

Publication level: 34 generated publication pages

protocol: Governed synthetic research protocol with sampling, weighting, reliability, validity and reproducibility controls

ethics: Synthetic records only; no real participants or personal data

peer review: Independent synthetic-publication review checklist completed

reproducibility: Deterministic inputs, versioned dataset and export manifest

inferential statistics: Enabled where assumptions and design permit

segmentation: Evidence-led segments

trend analysis: Three-period synthetic series

DEC-EVI-01: Require source lineage for every publishable claim. â€ Owner Country Director / Programme Executive â€ 0â 90 days â€ High â full business case and multi-year funding commitment required cost â€ Indicator Share of the critical-tier delivery plan confirmed complete each quarter (DEC-EVI-01)
