

VOICEINSIGHTS AFRICA

SYNTHETIC DEMONSTRATION PUBLICATION

Humanitarian Needs Assessment Report

Somalia | Humanitarian Response

1,281 synthetic responses

Prepared by VoiceInsights Africa

Every Voice. Every Language. Every Insight.

Synthetic demonstration. Not official statistics.

Every number in this publication answers one question: what is actually happening with humanitarian response performance in Somalia, and for whom. The pattern that emerges is one of uneven progress, concentrated risk, and opportunities that remain genuinely actionable. The discipline behind this publication is traceability – synthetic evidence behind every finding, a named owner behind every recommendation, one internally consistent dataset behind every statistic.

Sample: 1281 synthetic responses – 86% response rate – 4 regions

Publication quality gate: publication ready

Bay Cluster: 73% performance, 399 responses, risk STABLE

Gedo Cluster: 74% performance, 345 responses, risk STABLE

Lower Shabelle Cluster: 75% performance, 294 responses, risk STABLE

Banadir Displacement Sites: 76% performance, 243 responses, risk STABLE

sex: Women 52% & Men 47% & Other / prefer not to say 1%

age: 18â 24 24% & 25â 39 38% & 40â 59 27% & 60+ 11%

location: Urban 44% & Rural 56%

IND-01 Multisector severity score: 51% vs target 92% â OFF_TRACK
IND-02 Protection referral coverage: 52% vs target 76% â OFF_TRACK
IND-03 Safe water access: 53% vs target 77% â OFF_TRACK
IND-04 Feedback closure rate: 54% vs target 78% â OFF_TRACK

Multisector severity is not a marginal delivery issue. In Bay Cluster, the governed evidence indicates a 71% performance signal, with rural women carrying the most consequential constraint. Left unaddressed, multisector severity becomes a structural risk to humanitarian response delivery in Somalia, not a temporary dip. Bay Cluster is furthest exposed, and rural women would carry the earliest and heaviest consequences of a further year's delay.

Evidence: EVI-HUM-001, EVI-HUM-004 & Confidence 96.5%

Protection exposure has become an accountability question rather than a measurement question. Evidence from Gedo Cluster places the signal at 72% and shows that young adults experience the largest gap between policy intent and lived delivery. The choice facing humanitarian response leadership in Somalia is straightforward even if the fix is not: act on protection exposure now, concentrated in Gedo Cluster where young adults carry the largest share of the gap, or accept a wider gap in a year's time.

Evidence: EVI-HUM-002, EVI-HUM-005 • Confidence 92%

Persons with disabilities in Lower Shabelle Cluster are living the consequence of safe water access, not simply reporting it. Their 73% signal is the clearest evidence leadership has that current measures fall short. persons with disabilities in Lower Shabelle Cluster do not experience safe water access as an abstract metric. They experience it as the difference between humanitarian response delivery that works and delivery that does not, and a twelve-month delay would deepen that gap rather than hold it steady.

Evidence: EVI-HUM-003, EVI-HUM-006 â€¢ Confidence 93%

74%. That is the acute livelihood stress signal recorded in Banadir Displacement Sites, and the headline figure understates the problem: disaggregated by group, frontline workers sit well below it. The clearest gap sits in Banadir Displacement Sites, concentrated among frontline workers. A twelve-month delay would let the gap compound into a harder, costlier problem.

Evidence: EVI-HUM-004, EVI-HUM-007 â€¢ Confidence 94%

The strategic opportunity lies in the variation, not the average. At 75%, Bay Cluster's accountability to affected people signal shows where implementation can move quickly, while the experience of low-income households defines the safeguard that must accompany scale. The same gap that makes accountability to affected people a risk also makes it an opportunity: Bay Cluster could close most of the distance to the rest of Somalia within a year if action starts now, with the clearest gains reaching low-income households first.

Evidence: EVI-HUM-005, EVI-HUM-008 & Confidence 89.5%

Bay Cluster â In Bay Cluster, multisector severity shapes whether rural women can turn services into lasting outcomes.â

Gedo Cluster â Young adults in Gedo Cluster put it plainly: protection exposure is what decides whether progress holds or slips back.â

Lower Shabelle Cluster â Why does Lower Shabelle Cluster lag behind? Ask persons with disabilities, and the answer comes back to safe water access.â

Banadir Displacement Sites â Elsewhere, acute livelihood stress might be a footnote.

For frontline workers in Banadir Displacement Sites, it is the whole story.â

Bay Cluster â Low-income households in Bay Cluster frame it simply: when accountability to affected people breaks down, everything else does too.â

Gedo Cluster â In Gedo Cluster, multisector severity shapes whether service managers can turn services into lasting outcomes.â

Lower Shabelle Cluster â Community leaders in Lower Shabelle Cluster put it plainly: protection exposure is what decides whether progress holds or slips back.â

Banadir Displacement Sites â Why does Banadir Displacement Sites lag behind? Ask private-sector partners, and the answer comes back to safe water access.â

Bay Cluster â Elsewhere, acute livelihood stress might be a footnote. For rural women in Bay Cluster, it is the whole story.â

Gedo Cluster â Young adults in Gedo Cluster frame it simply: when accountability to affected people breaks down, everything else does too.â

Risks and alternative trajectories are modelled to show how VoiceInsights translates evidence into prioritised management choices.

DEC-HUM-01 CRITICAL: Prioritise severity-four locations in the next allocation round. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 0â 90 days; Indicator: Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-HUM-01)

DEC-HUM-02 CRITICAL: Scale protection referral and safe disclosure pathways. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 3â 12 months; Indicator: Number of agreed milestones for DEC-HUM-02 confirmed complete at each quarterly review

DEC-HUM-03 HIGH: Restore minimum safe-water coverage at priority sites. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 3â 12 months; Indicator: Percentage of agreed milestones completed for DEC-HUM-03

DEC-HUM-04 HIGH: Expand shock-responsive cash with market monitoring. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 3â 12 months; Indicator: Share of the high-tier delivery plan confirmed complete each quarter (DEC-HUM-04)

DEC-HUM-05 MEDIUM: Close the community feedback loop within fourteen days. Owner: Humanitarian Coordinator / Cluster Lead; Timeline: 6â 18 months; Indicator: Milestone completion rate tracked against the DEC-HUM-05 delivery plan

Prioritise severity-four locations in the next allocation round.

Strategic priority: CRITICAL

Evidence used: EVI-HUM-001, EVI-HUM-004

Rationale: Multisector severity is not a marginal delivery issue. In Bay Cluster, the governed evidence indicates a 71% performance signal, with rural women carrying the most consequential constraint. Left unaddressed, multisector severity becomes a structural risk to humanitarian response delivery in Somalia, not a temporary dip. Bay Cluster is furthest exposed, and rural women would carry the earliest and heaviest consequences of a further year's delay.

Expected benefit: Faster, better-evidenced humanitarian response decisions that the humanitarian coordination team can act on with confidence.

Expected risk: Competing priorities crowding out sustained follow-through

Dependencies: Sign-off from the relevant oversight body; Named executive sponsor;

Validated operational baseline

Budget requirement: High â full business case and multi-year funding commitment required

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 0â 90 days

Monitoring indicator: Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-HUM-01)

Success criteria: A majority of milestones achieved, each independently verified against real evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Scale protection referral and safe disclosure pathways.

Strategic priority: CRITICAL

Evidence used: EVI-HUM-002, EVI-HUM-005

Rationale: Protection exposure has become an accountability question rather than a measurement question. Evidence from Gedo Cluster places the signal at 72% and shows that young adults experience the largest gap between policy intent and lived delivery. The choice facing humanitarian response leadership in Somalia is straightforward even if the fix is not: act on protection exposure now, concentrated in Gedo Cluster where young adults carry the largest share of the gap, or accept a wider gap in a year's time.

Expected benefit: Reduced variation in humanitarian response delivery and a stronger evidence base for the next planning cycle.

Expected risk: Fragmented accountability once implementation moves beyond the pilot stage

Dependencies: Named executive sponsor; Confirmed budget release; Timely data collection for the next reporting cycle

Budget requirement: Medium â detailed costing and fiduciary review required

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â 12 months

Monitoring indicator: Number of agreed milestones for DEC-HUM-02 confirmed complete at each quarterly review

Success criteria: Milestone completion confirmed by evidence review, not self-reported progress

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Restore minimum safe-water coverage at priority sites.

Strategic priority: HIGH

Evidence used: EVI-HUM-003, EVI-HUM-006

Rationale: Persons with disabilities in Lower Shabelle Cluster are living the consequence of safe water access, not simply reporting it. Their 73% signal is the clearest evidence leadership has that current measures fall short. persons with disabilities in Lower Shabelle Cluster do not experience safe water access as an abstract metric. They experience it as the difference between humanitarian response delivery that works and delivery that does not, and a twelve-month delay would deepen that gap rather than hold it steady.

Expected benefit: A stronger, more defensible case for humanitarian response investment in the next planning cycle.

Expected risk: Execution capacity and coordination risk

Dependencies: Validated operational baseline; Cross-team delivery coordination; Sign-off from the relevant oversight body

Budget requirement: Medium â likely fundable from existing lines, pending confirmation

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â 12 months

Monitoring indicator: Percentage of agreed milestones completed for DEC-HUM-03

Success criteria: Verified evidence of at least 80% delivery against the agreed milestone plan

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Expand shock-responsive cash with market monitoring.

Strategic priority: HIGH

Evidence used: EVI-HUM-004, EVI-HUM-007

Rationale: 74%. That is the acute livelihood stress signal recorded in Banadir

Displacement Sites, and the headline figure understates the problem: disaggregated by group, frontline workers sit well below it. The clearest gap sits in Banadir

Displacement Sites, concentrated among frontline workers. A twelve-month delay would let the gap compound into a harder, costlier problem.

Expected benefit: Improved equity, delivery confidence and measurable humanitarian response performance.

Expected risk: Insufficient ownership or delayed resourcing

Dependencies: Quarterly evidence review; Stable staffing through the delivery window;

Named executive sponsor

Budget requirement: Low to medium â validate through the formal planning cycle

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3â12 months

Monitoring indicator: Share of the high-tier delivery plan confirmed complete each quarter (DEC-HUM-04)

Success criteria: At least 80% of milestones achieved with verified evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Close the community feedback loop within fourteen days.

Strategic priority: MEDIUM

Evidence used: EVI-HUM-005, EVI-HUM-008

Rationale: The strategic opportunity lies in the variation, not the average. At 75%, Bay Cluster's accountability to affected people signal shows where implementation can move quickly, while the experience of low-income households defines the safeguard that must accompany scale. The same gap that makes accountability to affected people a risk also makes it an opportunity: Bay Cluster could close most of the distance to the rest of Somalia within a year if action starts now, with the clearest gains reaching low-income households first.

Expected benefit: The evidence points toward improved humanitarian response outcomes, though the size of the gain will depend on how consistently the action is resourced.

Expected risk: Likely â though not certain â erosion of momentum if the initial sponsor changes role

Dependencies: Confirmed budget release; Timely data collection for the next reporting cycle; Validated operational baseline

Budget requirement: Low â absorbable within existing allocations, subject to confirmation

Owner: Humanitarian Coordinator / Cluster Lead

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 6â 18 months

Monitoring indicator: Milestone completion rate tracked against the DEC-HUM-05 delivery plan

Success criteria: A majority of milestones achieved, each independently verified against real evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

research objectives: Assess humanitarian response performance and equity; Identify operational drivers and decision priorities

evaluation questions: What outcomes are changing?; Who is being left behind?; Which actions are most likely to improve performance?

sampling frame: Synthetic programme population frame for Somalia

sample size: 1281

stratification: Region; Location type; Sex; Age; Disability

weights: Normalized post-stratification weights

confidence intervals: 95%

design effect: 1.2

missing data: Documented and sensitivity-tested

reliability: Cronbach alpha 0.86

validity: Content and construct validity checks

metadata: Complete synthetic data dictionary and lineage registry

Publication level: 34 generated publication pages

protocol: Governed synthetic research protocol with sampling, weighting, reliability, validity and reproducibility controls

ethics: Synthetic records only; no real participants or personal data

peer review: Independent synthetic-publication review checklist completed

reproducibility: Deterministic inputs, versioned dataset and export manifest

inferential statistics: Enabled where assumptions and design permit
segmentation: Evidence-led segments
trend analysis: Three-period synthetic series

DEC-HUM-01: Prioritise severity-four locations in the next allocation round. Owner Humanitarian Coordinator / Cluster Lead 0 90 days High full business case and multi-year funding commitment required cost Indicator Quarterly-verified progress against the milestones agreed for this critical-tier decision (DEC-HUM-01)

DEC-HUM-02: Scale protection referral and safe disclosure pathways. Owner Humanitarian Coordinator / Cluster Lead 3 12 months Medium detailed costing and fiduciary review required cost Indicator Number of agreed milestones for DEC-HUM-02 confirmed complete at each quarterly review

DEC-HUM-03: Restore minimum safe-water coverage at priority sites. Owner Humanitarian Coordinator / Cluster Lead 3 12 months Medium likely fundable from existing lines, pending confirmation cost Indicator Percentage of agreed milestones completed for DEC-HUM-03

DEC-HUM-04: Expand shock-responsive cash with market monitoring. Owner Humanitarian Coordinator / Cluster Lead 3 12 months Low to medium validate through the formal planning cycle cost Indicator Share of the high-tier delivery plan confirmed complete each quarter (DEC-HUM-04)

DEC-HUM-05: Close the community feedback loop within fourteen days. Owner Humanitarian Coordinator / Cluster Lead 6 18 months Low absorbable within existing allocations, subject to confirmation cost Indicator Milestone completion rate tracked against the DEC-HUM-05 delivery plan
