

VOICEINSIGHTS AFRICA

SYNTHETIC DEMONSTRATION PUBLICATION

Quarterly Performance Intelligence Report

Mozambique | Programme Delivery

3,976 synthetic responses

Prepared by VoiceInsights Africa

Every Voice. Every Language. Every Insight.

Synthetic demonstration. Not official statistics.

Mozambique’s programme delivery performance is improving in some places and stalling in others – this publication shows exactly where. The evidence points to concentrated risk, but also to specific, actionable openings for decision-makers. This publication’s claims are only as strong as their sourcing – which is why every finding is evidence-linked, every recommendation is owned, and every statistic shares the same governed dataset.

Sample: 3976 synthetic responses – 78% response rate – 4 regions

Publication quality gate: publication ready

North Portfolio: 74% performance, 1234 responses, risk STABLE
Central Portfolio: 75% performance, 1073 responses, risk STABLE
Coastal Portfolio: 76% performance, 914 responses, risk STABLE
Cross-Cutting Services: 77% performance, 755 responses, risk STABLE

sex: Women 52% & Men 47% & Other / prefer not to say 1%

age: 18& 24 24% & 25& 39 38% & 40& 59 27% & 60+ 11%

location: Urban 44% & Rural 56%

IND-01 Milestone delivery rate: 77% vs target 84% â WATCH

IND-02 Evidence-backed budget absorption: 78% vs target 85% â WATCH

IND-03 Partner performance score: 79% vs target 86% â WATCH

IND-04 Corrective-action closure: 80% vs target 87% â WATCH

61%. That is the milestone delivery signal recorded in North Portfolio, and the headline figure understates the problem: disaggregated by group, rural women sit well below it. The clearest gap sits in North Portfolio, concentrated among rural women. A twelve-month delay would let the gap compound into a harder, costlier problem.

Evidence: EVI-QUA-001, EVI-QUA-004 • Confidence 95.5%

What would it take to fix budget absorption quality? Start with Central Portfolio, where the signal sits at 62% and young adults carry most of the shortfall. The honest answer is sustained attention, not a single intervention. Central Portfolio shows the sharpest divide, where young adults carry the largest share of the gap. Left unaddressed for a year, the imbalance is likely to erode equity, delivery confidence and the durability of results.

Evidence: EVI-QUA-002, EVI-QUA-005 â€¢ Confidence 96.5%

The aggregate result conceals a material implementation divide. Coastal Portfolio records a 63% signal for partner performance; the shortfall is concentrated among persons with disabilities, where service continuity and confidence move together. Of every study area examined in Mozambique, partner performance shows up hardest there, and persons with disabilities feel it most. A year of inaction would turn a gap into a pattern that is far harder to reverse.

Evidence: EVI-QUA-003, EVI-QUA-006 & Confidence 92%

Two things are true at once about procurement delay. The national picture is improving, and Cross-Cutting Services – where frontline workers report a 64% signal – is not improving fast enough to close the gap. Programme delivery performance in Mozambique looks stable in aggregate but splits sharply once procurement delay is disaggregated. Cross-Cutting Services anchors the low end, and frontline workers bear most of that shortfall – a pattern that risks compounding without intervention within the year.

Evidence: EVI-QUA-004, EVI-QUA-007 – Confidence 93%

Progress on corrective-action closure remains visible but not yet durable. The 65% result in North Portfolio weakens after disaggregation, particularly for low-income households, suggesting that current gains depend on delivery conditions that remain fragile. The clearest signal in this dataset â though not the only one â is corrective-action closure in North Portfolio, where low-income households sit furthest from parity.

Evidence: EVI-QUA-005, EVI-QUA-008 â Confidence 94%

North Portfolio â In North Portfolio, milestone delivery shapes whether rural women can turn services into lasting outcomes.â

Central Portfolio â Young adults in Central Portfolio put it plainly: budget absorption quality is what decides whether progress holds or slips back.â

Coastal Portfolio â Why does Coastal Portfolio lag behind? Ask persons with disabilities, and the answer comes back to partner performance.â

Cross-Cutting Services â Elsewhere, procurement delay might be a footnote. For frontline workers in Cross-Cutting Services, it is the whole story.â

North Portfolio â Low-income households in North Portfolio frame it simply: when corrective-action closure breaks down, everything else does too.â

Central Portfolio â In Central Portfolio, milestone delivery shapes whether service managers can turn services into lasting outcomes.â

Coastal Portfolio â Community leaders in Coastal Portfolio put it plainly: budget absorption quality is what decides whether progress holds or slips back.â

Cross-Cutting Services â Why does Cross-Cutting Services lag behind? Ask private-sector partners, and the answer comes back to partner performance.â

North Portfolio â Elsewhere, procurement delay might be a footnote. For rural women in North Portfolio, it is the whole story.â

Central Portfolio â Young adults in Central Portfolio frame it simply: when corrective-action closure breaks down, everything else does too.â

Risks and alternative trajectories are modelled to show how VoiceInsights translates evidence into prioritised management choices.

DEC-QUA-01 CRITICAL: Launch a thirty-day recovery sprint for red milestones. Owner: Country Director / Programme Executive; Timeline: 0â 90 days; Indicator: Percentage of agreed milestones completed for DEC-QUA-01

DEC-QUA-02 CRITICAL: Link budget release to verified delivery evidence. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Share of the critical-tier delivery plan confirmed complete each quarter (DEC-QUA-02)

DEC-QUA-03 HIGH: Place underperforming partners on time-bound support plans. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Milestone completion rate tracked against the DEC-QUA-03 delivery plan

DEC-QUA-04 HIGH: Escalate critical procurement bottlenecks. Owner: Country Director / Programme Executive; Timeline: 3â 12 months; Indicator: Proportion of agreed implementation steps verified on schedule for DEC-QUA-04

DEC-QUA-05 MEDIUM: Close overdue management actions before quarter end. Owner: Country Director / Programme Executive; Timeline: 6â 18 months; Indicator: Quarterly-verified progress against the milestones agreed for this medium-tier decision (DEC-QUA-05)

Launch a thirty-day recovery sprint for red milestones.

Strategic priority: CRITICAL

Evidence used: EVI-QUA-001, EVI-QUA-004

Rationale: 61%. That is the milestone delivery signal recorded in North Portfolio, and the headline figure understates the problem: disaggregated by group, rural women sit well below it. The clearest gap sits in North Portfolio, concentrated among rural women. A twelve-month delay would let the gap compound into a harder, costlier problem.

Expected benefit: Faster, better-evidenced programme delivery decisions that programme leadership can act on with confidence.

Expected risk: Competing priorities crowding out sustained follow-through

Dependencies: Validated operational baseline; Cross-team delivery coordination; Sign-off from the relevant oversight body

Budget requirement: Medium to high â requires a dedicated budget line and phased release

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 0â 90 days

Monitoring indicator: Percentage of agreed milestones completed for DEC-QUA-01

Success criteria: Verified evidence of at least 80% delivery against the agreed milestone plan

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Link budget release to verified delivery evidence.

Strategic priority: CRITICAL

Evidence used: EVI-QUA-002, EVI-QUA-005

Rationale: What would it take to fix budget absorption quality? Start with Central Portfolio, where the signal sits at 62% and young adults carry most of the shortfall.

The honest answer is sustained attention, not a single intervention. Central Portfolio shows the sharpest divide, where young adults carry the largest share of the gap. Left unaddressed for a year, the imbalance is likely to erode equity, delivery confidence and the durability of results.

Expected benefit: Reduced variation in programme delivery and a stronger evidence base for the next planning cycle.

Expected risk: Fragmented accountability once implementation moves beyond the pilot stage

Dependencies: Quarterly evidence review; Stable staffing through the delivery window; Named executive sponsor

Budget requirement: High – full business case and multi-year funding commitment required

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3 – 12 months

Monitoring indicator: Share of the critical-tier delivery plan confirmed complete each quarter (DEC-QUA-02)

Success criteria: At least 80% of milestones achieved with verified evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Place underperforming partners on time-bound support plans.

Strategic priority: HIGH

Evidence used: EVI-QUA-003, EVI-QUA-006

Rationale: The aggregate result conceals a material implementation divide. Coastal Portfolio records a 63% signal for partner performance; the shortfall is concentrated among persons with disabilities, where service continuity and confidence move together. Of every study area examined in Mozambique, partner performance shows up hardest there, and persons with disabilities feel it most. A year of inaction would turn a gap into a pattern that is far harder to reverse.

Expected benefit: A stronger, more defensible case for programme delivery investment in the next planning cycle.

Expected risk: Execution capacity and coordination risk

Dependencies: Confirmed budget release; Timely data collection for the next reporting cycle; Validated operational baseline

Budget requirement: Low – absorbable within existing allocations, subject to confirmation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3–12 months

Monitoring indicator: Milestone completion rate tracked against the DEC-QUA-03 delivery plan

Success criteria: A majority of milestones achieved, each independently verified against real evidence

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Escalate critical procurement bottlenecks.

Strategic priority: HIGH

Evidence used: EVI-QUA-004, EVI-QUA-007

Rationale: Two things are true at once about procurement delay. The national picture is improving, and Cross-Cutting Services – where frontline workers report a 64% signal – is not improving fast enough to close the gap. Programme delivery performance in Mozambique looks stable in aggregate but splits sharply once procurement delay is disaggregated.

Cross-Cutting Services anchors the low end, and frontline workers bear most of that shortfall – a pattern that risks compounding without intervention within the year.

Expected benefit: Improved equity, delivery confidence and measurable programme delivery performance.

Expected risk: Insufficient ownership or delayed resourcing

Dependencies: Cross-team delivery coordination; Sign-off from the relevant oversight body; Quarterly evidence review

Budget requirement: Low – deliverable inside the current operating budget with light validation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 3 – 12 months

Monitoring indicator: Proportion of agreed implementation steps verified on schedule for DEC-QUA-04

Success criteria: Milestone completion confirmed by evidence review, not self-reported progress

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

Close overdue management actions before quarter end.

Strategic priority: MEDIUM

Evidence used: EVI-QUA-005, EVI-QUA-008

Rationale: Progress on corrective-action closure remains visible but not yet durable.

The 65% result in North Portfolio weakens after disaggregation, particularly for low-income households, suggesting that current gains depend on delivery conditions that remain fragile. The clearest signal in this dataset – though not the only one – is corrective-action closure in North Portfolio, where low-income households sit furthest from parity.

Expected benefit: The evidence points toward improved programme delivery outcomes, though the size of the gain will depend on how consistently the action is resourced.

Expected risk: Likely – though not certain – erosion of momentum if the initial sponsor changes role

Dependencies: Stable staffing through the delivery window; Named executive sponsor;

Confirmed budget release

Budget requirement: Medium – likely fundable from existing lines, pending confirmation

Owner: Country Director / Programme Executive

Supporting organization: M&E, Finance, Safeguarding and Delivery Units

Timeline: 6 – 18 months

Monitoring indicator: Quarterly-verified progress against the milestones agreed for this medium-tier decision (DEC-QUA-05)

Success criteria: Verified evidence of at least 80% delivery against the agreed milestone plan

Management response: PENDING FORMAL MANAGEMENT RESPONSE

Follow-up: Assign accountable owner; Validate budget; Approve milestone plan; Review evidence quarterly

research objectives: Assess programme delivery performance and equity; Identify operational drivers and decision priorities

evaluation questions: What outcomes are changing?; Who is being left behind?; Which actions are most likely to improve performance?

sampling frame: Synthetic programme population frame for Mozambique

sample size: 3976

stratification: Region; Location type; Sex; Age; Disability

weights: Normalized post-stratification weights

confidence intervals: 95%

design effect: 1.6

missing data: Documented and sensitivity-tested

reliability: Cronbach alpha 0.86

validity: Content and construct validity checks

metadata: Complete synthetic data dictionary and lineage registry

Publication level: 34 generated publication pages

protocol: Governed synthetic research protocol with sampling, weighting, reliability, validity and reproducibility controls

ethics: Synthetic records only; no real participants or personal data

peer review: Independent synthetic-publication review checklist completed

reproducibility: Deterministic inputs, versioned dataset and export manifest

inferential statistics: Enabled where assumptions and design permit
segmentation: Evidence-led segments
trend analysis: Three-period synthetic series

DEC-QUA-01: Launch a thirty-day recovery sprint for red milestones. Owner Country Director / Programme Executive 0 90 days Medium to high requires a dedicated budget line and phased release cost Indicator Percentage of agreed milestones completed for DEC-QUA-01

DEC-QUA-02: Link budget release to verified delivery evidence. Owner Country Director / Programme Executive 3 12 months High full business case and multi-year funding commitment required cost Indicator Share of the critical-tier delivery plan confirmed complete each quarter (DEC-QUA-02)
