Every Voice. Every Language. Every Insight.

Synthetic demonstration. Not official statistics.

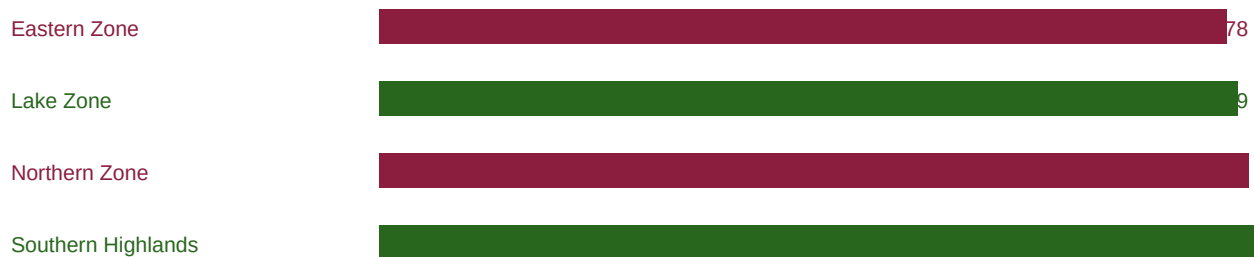

Tanzania has made real gains in health systems performance – and real gaps remain alongside them. This publication separates the two, using a governed evidence model built to surface risk and opportunity, not just describe them. No claim in this publication stands alone: findings link to synthetic evidence, recommendations carry a named owner, and every statistic shares one internally consistent dataset.

Sample: 4532 synthetic responses – 90% response rate – 4 regions
